

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	30/06/2026
Roll Number	23A51A4272
Project Name	Library Book Request Management in ServiceNow
Maximum Marks	4 Marks

Functional Requirements :

Requirement ID	Functional Requirement	Description
FR-1	Submit Library Book Request	Students can submit library book requests by filling out the Library Book Request form.
FR-2	Request Validation	The system validates the Issue Date using a Business Rule to ensure that past dates cannot be selected.
FR-3	Record Management	The system automatically creates and stores library book request records in the Library Book Request table.
FR-4	Email Notifications	The system automatically sends an email notification to the librarian when a new library book request is submitted.
FR-5	Request Tracking	Students and librarians can view and track the current status of submitted library book requests..

Non-Functional Requirements :

Requirement ID	Non-Functional Requirement	Description
NFR-1	Performance	The system should process library book requests quickly and efficiently.

NFR-2	Security	Only authorized users should be able to access and manage library book request records.
NFR-3	Reliability	The system should operate without errors and maintain accurate request data.
NFR-4	Usability	The application should provide a simple, user-friendly interface for students and librarians.
NFR-5	Availability	The system should be available whenever users need to submit or manage library book requests.
