What is an Empathy Map?

An Empathy Map is a collaborative tool used to understand the users of a system by capturing their thoughts, feelings, challenges, needs and goals. It helps us step into the users' shoes to design solutions that are user-centered and solve the right problems.

For our project – Library Book Request Management in ServiceNow, the empathy map helps us understand the end users and librarians who interact with the system.

EMPATHY MAP – Library Book Request Management in ServiceNow

1. I AM (Who are we empathizing with?)

- Students who request books from the library
- Librarian who reviews and processes requests
- Library Staff who manage book records
- System Administrators who maintain the system
- Management who monitor reports and statistics

Users & Librarians
(Students, Librarian,
Library Staff)
(Stakeholders)

2. I'M TRYING TO (What are they trying to do?)

- Submit book requests easily and quickly
- Provide accurate details (book, dates, purpose)
- Track the status of my request in real-time
- Get books issued and return on time
- Ensure proper communication and notifications
- Reduce manual work and delays

3. BUT (What are their pain points?)

- Manual request process is time-consuming
- Lack of visibility on request status
- Delays in approval and book issue
- Missing or incorrect information in requests
- No automatic validation for dates
- High workload and repetitive tasks for librarians

4. BECAUSE (Why do these pain points exist?)

- No centralized system for book requests
- Processes are manual and not automated
- Multiple tools and email communication
- Lack of integration between systems
- No real-time notifications and status updates
- Complex tracking and record management

5. WHICH MAKES ME FEEL (What emotions do they experience?)

Frustrated
due to delays and
manual process

Uncertain
about the status
of the request

Inefficient
wasting time on
repetitive tasks

Overwhelmed
by long approval
and tracking steps

Satisfied
when requests are
quickly resolved

Confident
in a transparent
and automated system

Key Insight: By understanding the users' needs, pain points and emotions, our solution focuses on automation, validation, real-time notifications and transparency to deliver a seamless library book request management experience in ServiceNow.
